Dear GEAA members,

Yay!

GEAA and San Geronimo Valley Alliance (SGVA) are very pleased to announce that a settlement agreement has been finalized between SGVA and BP Properties, Ltd., regarding the proposed Hills of Castle Rock development, located ten miles northwest of Helotes.

The Hills of Castle Rock's application for a permit to release wastewater effluent into the San Geronimo Creek, a major conduit of recharge to the Edwards Aquifer, inspired State Representative David Leibowitz to file HB 595 (State Senator Leticia Van de Putte filed companion SB 822) to prohibit this practice. Under the terms of the agreement, no effluent will be released into the San Geronimo Creek and impervious cover is limited to 15%.

For more details about this settlement, visit [our website](#). Thanks for your support!

Annalisa Peace
